

**itelligence makes its mark as a full-service provider for SAP in Austria**

### **itelligence presents newly qualified it.wood All-in-One industry solution at exponet ) in Vienna**

Vienna, February 11, 2003 – At exponet in Vienna (February 11 to 13, 2003), itelligence Business Solutions GmbH will present “Lean industry solutions for mid-sized businesses”. At the SAP partner booth (level OE/booth 64), itelligence will exhibit its newly qualified mySAP All-in-One solution for the wood and furniture industry for the first time in Austria. it.wood confirms itelligence’s position as a successful full-service provider of SAP solutions for Austrian mid-sized companies. itelligence has developed the highest number of qualified mySAP All-in-One industry solutions worldwide. Other current industry solutions on display at the trade fair will include it.engine for the mechanical engineering industry, it.automotive supplier for automotive suppliers and it.trade for wholesalers.

Mid-sized companies expect a speedy implementation of IT projects and concrete support. itelligence meets these requirements through a successful combination of innovative SAP-based industry solutions and its proven expertise in the development of individual software solutions. In 2002, itelligence demonstrated its ability to ensure a fast introduction of mySAP.com and individual IT solutions with a number of successful Austrian companies including MABA Fertigteilindustrie, Austrian Airlines, ESSO, Kraftverkehr Nagel, Mayr-Melnhof, Octapharma Pharmazeutika and SAGEM Communications. At exponet in Vienna, trade visitors can learn about several concrete solutions implemented for customers by itelligence’s experts.

Extensive knowledge of the implementation process, international operations, industry expertise and close cooperation with SAP enable itelligence to bring the most strategic solutions to its customers. itelligence employs 1,450 people, 22 of which reside in Austria and is a leading international SAP partner. At a recent SAP Partner Information Day in Germany, itelligence AG received the SAP award for the top-selling SME partner in 2002.

Background information about itelligence AG’s industry solutions

#### it.wood All-in-One

it.wood helps the wood and furniture industry face one of its biggest challenges: the large number of options. it.wood add-ons include a customized order entry module for the entry of cross-product data, modules permitting rough capacity checks and variation-oriented order scheduling as well as modules displaying the production and order status. it.wood permits

fast commercial order entries and provides a link to a graphical order entry system. Graphics software may, for example, be used to directly compare drawings of the room with the planned piece of furniture entered via the order entry screen. Any modifications made using the graphics program will be taken into account in the order entry module. An interface enables the online and offline exchange of data between the order entry module and graphics programs, making the redundant entry of master data superfluous. In addition, it.wood permits the generation of packaging bags, connects to cutting systems and supports the assembly and packaging based on the shipping date.

#### it.engine All-in-One

The industry solution it.engine is based on many years of experience in the mechanical engineering and high-tech sector as well as in the metal-working and plastics processing industries. The software integrates all business units of these industries by covering all their core processes up to the integration of their accounting systems. CAD integration and collaborative engineering, production and machine data acquisition as well as an Internet interface ensure constant availability of all necessary data, resulting in shorter supply and reduced costs. itelligence also develops customized versions of it.engine for the different industry segments.

#### it.automotive supplier

it.automotive supplier is a fully integrated solution based on mySAP Automotive. It supports the entire supply chain, from the pre-production order to the sales order submitted by EDI (electronic data interchange) to production planning and control.

#### it.trade All-in-One

Challenges including the new economy and the need to offer a broad range of products and services represent major trends for wholesalers and retailers. New business processes have to be developed and old processes have to be reviewed. SAP AG's mySAP.com is a comprehensive solution permitting the optimum integration of all business processes via the Internet. Based on mySAP.com, itelligence's it.trade All-in-One helps wholesalers and retailers consolidate their market position and expand their customer relationships.
