

**International full-service provider for SAP, itelligence: “Time for the Future” at CeBIT, Hanover, from March 12 to 19, 2003**

### **itelligence AG presents new mySAP All-in-One it.consumer industry solution**

Frankfurt, February, 25, 2003 - At CeBIT 2003 in Hanover from March 12 to 19, itelligence AG will present its new it.consumer solution for the food industry under the motto “Time for the Future”. Reference customers, demonstrations and lectures will make the full range of services transparent to visitors. At Hall 4 Booth F 48, the international full-service provider for SAP will illustrate the use of the new SAP technology, NetWeaver, the SAP Solution Manager, customer relationship management and supply chain management solutions as well as SAP’s portal technology by way of practical examples. On some 150 sq., itelligence will show its industry-specific solutions based on mySAP All-in-One as well as its broad range of IT outsourcing and other services. In addition, itelligence will present new developments in the areas of mySAP Enterprise Solutions, SAP Business One and the integration of Lotus Notes and SAP. Some 50 practice-oriented, interactive lectures focusing on technical and industry-specific aspects will give visitors a quick overview of itelligence AG’s national and international range of products and services.

New industry solution: it.consumer

itelligence’s it.consumer solution will be presented to the general public for the first time at this year’s CeBIT. The new mySAP All-in-One solution developed for the food industry focuses, on the one hand, on seamless logistical processes throughout the entire value chain. On the other hand, it.consumer supports the integration of the strategic SAP products for supply chain management and business intelligence (BI) as well as the Advanced Planner and Optimizer (APO). Current legal regulations such as the new EU directive on the traceability of batches (EU 178/2002) and new market requirements such as the pay-on-scan process which enables the automatic ordering of goods based on the individual retailer’s scanner data in a vendor-managed inventory scenario (VMI) have already been implemented. The new solution also integrates mobile scanners allowing to optimize merchandise purchasing and sales processes as well as industry-specific features such as account settlement on broker and commission basis as well as the generation of price catalogues for the SINFOS database.

Practical example of innovative SAP technology

itelligence will allow visitors insights into the latest SAP technology developments. Practical examples will illustrate the benefits of the SAP NetWeaver and SAP Solution Manager. Kasolvenzia will be shown as an example for an itelligence customer using the NetWeaver technology. Further practical examples from the fields of customer relationship management (CRM) illustrated by way of the international Kraftverkehr Nagel company, supply chain management (SCM) and enterprise portals illustrated by way of Nordenia International AG, Europe's fifth largest manufacturer of sugar, will confirm itelligence's technology leadership in other areas of SAP technology.

Industry solutions

itelligence will furthermore exhibit its proven mySAP All-in-One industry solutions for the manufacturing industry, processing industry and wholesalers/retailers including the service sector. itelligence's experts will explain the use of the industry-specific solutions it.automotive supplier, it.engine, it.chemicals, it.metal, it.service and it.wood for national and international roll-outs to interested visitors from mid-sized enterprises and international groups.

IT outsourcing and services

Visitors will be given a comprehensive overview of itelligence AG's sophisticated range of IT outsourcing and other services as well as application service providing solutions (ASP). This section will focus on the SAP Solution Manager covering aspects such as operations and support desk organization as well as mySAP e-Procurement including catalogue management, the SAP Exchange Infrastructure, archiving and terminal services.

Lotus Notes

In the Lotus Notes section, itelligence's Lotus Notes Competence Centre will show new developments from the field of ERP integration. The focus will be on the integration of Notes and SAP by means of the konplan ZeNotes program.

Partner

itelligence's partner, WSW Software GmbH, will present SPEEDI, an SAP add-on solution for the optimization of EDI processes of automotive suppliers, at the itelligence booth.
